

Adapted from Rackham Graduate School, UMich

Department of Geology & Geophysics

I will:

be committed to mentoring the student

be committed to the research project of the graduate student.

be committed to meeting with the student on a regular basis

be knowledgeable of the department and graduate school rules and regulations and will guide the student, especially when the student is 'lost'.

help the student in selecting a graduate advisory committee and put together a relevant GSP

help the student in developing required skills eg. in oral and written communication, grant writing, ethical conduct in research, scientific publication etc.

discuss policies on authorship in papers, data ownership etc. and clarify my expectations for office hours, vacations etc. with the graduate student.

encourage the graduate student to attend professional meetings, disseminate research results, build a strong
