

Aurora Z Art

Create your own artwork inspired by the northern lights!

Materials Needed

Aurora stencil (or draw your own), black paper, colored chalk, scissors.
Optional: Tissues.

Instructions:

Step 1: Cut out the aurora stencil. If making your own, cut a strip of white paper or cardstock in a wavy aurora shape.

Step 2: Color the top edge of the stencil with colored chalk.

Step 3: Place the colored stencil on your black paper, chalk side up. Smudge the chalk onto the black paper using your finger or a tissue.

Step 4: Repeat using different colors to fill the sky with the colors of the aurora.

Step 5: Add a cabin, trees, campfires, or other things you might see under the northern lights. Be creative!

Aurora Colors

The Sun emits a constant stream of particles, called the solar wind.

toward the poles. When the particles enter the atmosphere, they crash into gases. This excites the gases, and they give off light like a neon sign.

of the northern lights.

Red light is caused by energized oxygen high in the atmosphere.

Green, the most common light, is caused by energized oxygen in the middle of the atmosphere.

Purple light, which can appear white or light blue, is caused by energized nitrogen lower in the atmosphere.
