

Gravity Scavenger Hunt

Go on a gravity scavenger hunt and experiment with science!

Materials Needed:

Printed gravity scavenger hunt cards and drawing sheet (or create your own); various household and outdoor items to complete scavenger hunt (ball, piece of cardboard, toy car, slide, rock, leaf, paint, paper, cup of water).

Instructions:

Turn simple everyday activities into an exciting science experiment. Babies, toddlers, and preschoolers will enjoy rediscovering gravity!

Cut out the gravity scavenger hunt cards and select cards that will work for the materials you have available. Lay cards in front of you and your child(ren). Let your child choose a card and do the experiment together. Draw it in your picture. See how many experiments you can try! Let your children invent more experiments to try and add them to your drawing.
