

NRM 212
GREENHOUSE MANAGEMENT
Spring 2023

Schedule

Monday 2:15 PM - 5:15 PM, Arctic Health Research Building room 1W05

Course Objective:

To guide students to an understanding of greenhouses and other controlled environment production systems with emphases on use, applications, management and operation.

Expected Student Outcome:

Students should understand major design and construction requirements for a greenhouse to function as an efficient growing environment for various crops. Students should also understand environmental control systems and management practices such as media, irrigation, fertilization, crop production systems and pest management. Students should have ability to recognize and appreciate opportunities and challenges for efficient greenhouse use under northern conditions.

Instructor:

Dr. Meriam Karlsson, Professor of Horticulture

Office: 1W04 Arctic Health Research Bldg., 474-7005, mgkarlsson@alaska.edu

Office hours: Tuesday and Thursday 10 am - 12 noon or by appointment
