**Physics Teaching Seminar/Practicum**

**Spring 2023**

**1 credit**

**Instructor: Michael M. Hull**

**Office: 120 Reich**

**Office Phone: (907) 474-6106**

**Email: mmhull2@alaska.edu**

**Office Hours:**

**Monday 4:15-5:00pm by Zoom**

## **Course Description**

Course content:

This course will give science graduate students both lectures and hands on training in dealing with all aspects of teaching (focused on, but not exclusive to, the Teaching Assistant level and beyond). We will cover topics in teaching pedagogy, preparation strategies, student management, time management and learning assessment. The course will be approximately 50% interactive lecture/ discussion and 50% practical exercises. This course is intended to provide both basic introductory and in-depth science teacher training and guidance at the college level. The methodology discussed will be how to use active learning techniques and when these are appropriate or inappropriate.

Student learning outcomes:

After this course, students will know the basics of good practices in university level active science education, will be able to deliver clear presentations, both lecture style and in lab format, will have a variety of tools for classroom management and student encouragement and will have extensively discussed and practiced how to be a good science educator/communicator.

The lectures will be given by a variety of instructors with expertise in the specific areas being covered, as well as by the students themselves. The practical exercise part will consist of preparation and presentation of classroom and lab examples, as well as practice of active learning strategies. Some of these will be taped and critiqued. Every week, time will be reserved for issues that are brought up by the students who are currently teaching so they can be discussed and solutions proposed by the group. Discussion will be an important part of the course.

- Course participants will have some input in special topics covered. Among the topics covered will be:  
Teaching pedagogy - including board skills, speaking skills, grading etc. (students will do practice examples of the good and the bad in these areas), engaging students, idea behind active learning and other techniques for engaging and facilitating student learning  
Preparation - "Why prepare, I know this material!", effective preparation, introducing material, preparing to teach the concepts, preparing to teach the math

Time management - Balancing demands, short cuts, using your resources  
Student/classroom management - starting out right, engaging students, respect, dealing with problems and student issues, cheating, being adaptable, using support  
Lab preparation and demo development - preparing labs, preparing for the labs, presenting the lab, grading the labs, developing demonstrations for specific topics, reading your audience, encouraging active learning and student participation  
Learning assessment - making quizzes (lab quizzes etc.), grading, encouraging feedback from students, other forms of assessment  
Cross cultural issues - teachers from various cultures and students from various cultures, what's acceptable under cultural differences and what is not, sensitivity to differences  
Ethical issues - plagiarism and other forms of cheating, respect, relationships  
Working with faculty- getting the most from the experience, asking questions  
Personal/Professional balance- Being a student at and an employee of the University

---

**Prerequisites:** Graduate Standing in a Science Discipline or permission of instructor

**Materials Needed:**

**Required Text:** Five Easy Lessons, Author: R. D. Knight, Addison Wesley, 2004

Supplemental journal articles DeHaan, R. L., 2005

**Attendance:**

Since 50% of the grade for this course is determined by participation, attendance of all lectures and practicum meetings is mandatory. If a student must miss class, they should notify the instructors beforehand or as soon as possible. For approved absences, missed participation work will be made up at the instructors' discretion. If a student is absent on a day they are set to present, the presentation will be done at a later class meeting.

**Contacting Me:** I have office hours as listed above. You can drop by at other times if I'm not busy, or make an appointment. I am (almost) available before class.

**Special Needs:** The Office of Disability Services implements the Americans with Disabilities Act (ADA), and insures that UAF students have equal access to the campus and course materials. We will work with the Office of Disabilities Services (203 WHIT, 474-7043) to provide reasonable accommodation to students with disabilities.

**COVID-19 statement:** Students should keep up-to-date on the university's policies, practices, and mandates related to COVID-19 by regularly checking this website: <https://sites.google.com/alaska.edu/coronavirus/uaf/uaf-students?authuser=0> Further, students
