

Committee (Chair: Bob Gault) have now approved the following:

Design (new applied course)

ED 140 - 3Cmp
This course is designed to provide students with the knowledge and skills necessary to design and develop products. The course covers the design process from concept to production, including the use of design software and prototyping techniques. Students will learn to identify user needs, create design specifications, and develop functional prototypes. The course also covers the importance of user-centered design and the role of design in product development.

ED 141 - 3Cmp
This course is designed to provide students with the knowledge and skills necessary to design and develop products. The course covers the design process from concept to production, including the use of design software and prototyping techniques. Students will learn to identify user needs, create design specifications, and develop functional prototypes. The course also covers the importance of user-centered design and the role of design in product development.

ED 142 - 3Cmp
This course is designed to provide students with the knowledge and skills necessary to design and develop products. The course covers the design process from concept to production, including the use of design software and prototyping techniques. Students will learn to identify user needs, create design specifications, and develop functional prototypes. The course also covers the importance of user-centered design and the role of design in product development.

ED 143 - 3Cmp
This course is designed to provide students with the knowledge and skills necessary to design and develop products. The course covers the design process from concept to production, including the use of design software and prototyping techniques. Students will learn to identify user needs, create design specifications, and develop functional prototypes. The course also covers the importance of user-centered design and the role of design in product development.

ED 144 - 3Cmp
This course is designed to provide students with the knowledge and skills necessary to design and develop products. The course covers the design process from concept to production, including the use of design software and prototyping techniques. Students will learn to identify user needs, create design specifications, and develop functional prototypes. The course also covers the importance of user-centered design and the role of design in product development.

ED 145 - 3Cmp
This course is designed to provide students with the knowledge and skills necessary to design and develop products. The course covers the design process from concept to production, including the use of design software and prototyping techniques. Students will learn to identify user needs, create design specifications, and develop functional prototypes. The course also covers the importance of user-centered design and the role of design in product development.
